Current Kernel Prices

Chandler LHP 20's currently in the \$2.40/lb to \$2.45/lb range with limited supply. LHP is \$2.20/lb to \$2.30/lb range. Combo Halves and Pieces in the \$1.85/lb to \$1.90/lb range.

Chile

Chile have started harvesting Serr and the crop is coming in slow due to cooler temperatures. Quality is expected to be much better than last year in terms of color, size, and yield. Chandler harvest will begin around mid-April. Crop size is expected to be around 150,000 tons vs 135,000 tons from 2020 crop. Delayed shipments from California have resulted in a slow start to Chile's 2021 season. After last year's poor quality of inshell many buyers in India, Morocco, Turkey, and UAE prefer to wait for the harvest before choosing the best lots to buy.
